IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Isaiah Moore, Jr.  
Serial No.: 09/829,643  
Filed : April 10, 2001  
For : Apparatus and Methods for Batting Practice and Playing Baseball  
Examiner: Mitra Aryanpour  
Art Unit: 3711

APPLICANT'S SUMMARY OF INTERVIEW

Mail Stop Amendment  
Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Sir:

In accordance with MPEP 713.04, the following summarizes the substance of an interview held on this date between the Examiner in charge of the application and the undersigned:

During the telephone interview, the changes made in claim 24 with regard to the ball's motion being exaggerated were discussed. The undersigned emphasized that the whole thrust of the claimed invention was to train baseball players to increase their proficiency in batting, whereas the only reference of record dealing with batting proficiency is that of DeLanzo which uses a batting aid to position the head of the batter correctly, a totally unrelated approach to improving hitting ability. The other references are concerned with pitching, not batting.

**BEST AVAILABLE COPY**

The Examiner questioned whether there was adequate support in the specification for the language added to claim 24 and this also was discussed. The specification does mention that the shape of the ball exaggerates the motion of the ball.

The Examiner indicated that she will review the amendment carefully in the light of the discussion.

A favorable action is solicited.

Respectfully submitted,

LEONARD BELKIN
